

Things to Do

1. Define the shale basin
 1. hydrocarbons should be sourced from shale not from coal
2. Identify lateral extent of shale
 - u Member countries to submit to CCOP TS by **22 April 2016**
 - Shale basin map (with coordinates)
 - Cross section with shale horizon
 - u KIGAM will digitize the maps & to be ready before UCM4.

Actions

- u CCOP/KIGAM will provide a checklist on things to do – circulated to national coordinators**
- u CCOP TS will send letter to PR, updating the progress of the Project and request for data**

Workshop/Meeting (UCM4)

- u **Workshop tentative schedule: 2nd week of May, Venue (to be confirmed)**
 - **Topics:**
 - F **training on quantifying minerals**
 - F **Sample analysis, TOC calculation**
 - F **Common method /consistency on data analysis**
 - F **Look into references related to regional tectonic events**
 - F **Discuss regional knowledge and possible funding (if there is a need to acquire new data)**
 - F **Discuss issues encountered /perceived by countries**
